THE Express continues to flounder, and the more it flounders the more Supreme Court was announced to be the damage it does to its cause and candidate. Go to, thou maladroit whipper in! You fatigue us.

BERRY and Bartlett are neck and neck almost, in the race for the Democratic nomination. It's all the same, men and brethren: John F. Swift is the next Governor of the Commonwealth!

LATE last night the Democratic platform came rolling into the TIMES office. from the hands of the brass-pourders several yards of manifold long. That is to say, the platform, not the brass pounders, was several yards long.

Our telegrams this morning announce the list, thus far appointed, of the Republican State Executive Committee-the dynamic force of the party. in the campaign. General John Mansfield will to-day be added as a member for the State at large. Upon the new Republican State Ex-

excutive Committee, which is to have the direction of the impending campaign, Major George H. Bonebrake has been appointed as the representative from Los Angeles; and ex-Governor John Mansfield will to-day be appointed as a member from the State at large. These are both commendable selections. The appointees are squaretoed Republicans, men of character and good workers. General Mansfield was an original advocate of Mr. Swift's nomion for the Governorship, has already done substantial work for him, and has proved himself a "stayer." Major Bonebrake, though not an original Swift man, may be depended upon

BAILBOAD TAXATION.

We condemn the railroad corporations of the State for their defiance of the State's power, their corrupt practices and their persistent refusal to contribute their just and lawful proportion of the revenue. The contempt and disgrace they thus throw upon free government is a first and long step to encourage communism and anarchy. If the rich may with impunity defy the laws, upon what principle in a government, which is based upon the cornerstone of equality, shall the poor be compelled to yield obedience? All law-abiding citizens should unite with the Democracy in their efforts to exact from these powerful corporations the observance of the law and an honest and faithful dis-charge of their obligations to the State and its inhabitants. THE HEATH AMENDMENT.

range Phenomena—A Terrible Night on a Bailway Train. CHARLESTON, S. C., Sept. 2 .- A special report from Mount Pleasant opposite Charleston, says that a sink near Gorman Church, which on Tuesday was perfectly dry, is now full of fresh water. It is contended by many that mud and other substances found around the village are volcanic matter. Just after the first great shock on Tuesday night there was a decided and distinot smell of escaping sulphuric acid gas over the entire village. The smell lasted throughout the night, and was distinct in those localities where the pavities were most numerous. Not far from Charleston, on the road to Summerfield, extensive mounds of clay were thrown up and hillocks of sand, in most cases in the shape of in-

verted cones, the hollow part of whica had evidently been formed by the action of water returning into the depths from which it had been raised. In many cases the ejected matter has streamed away from breaks in the surace of the earth to a distance of from twenty to fifty feet. These evidences of a great convulsion are not few. They extend far and wide in every diton to Summerville, and at the latter place it was found from trustworthy nformation that cracks and fissures are everywhere visible for miles and miles around. Strangely enough some of these were in active operation, and the merville sent water out of these fissures merville sent water out of these issures in jets to a height of some fifteen to twenty feet. This was evidently the result of the cracks being filled with water and then the sides opening and

that there would be a general founda-tion caused by some extraordinary lorce of the earthquake.

Mexicans — Slanders Refuted and Misapprehensions Removed.

| SPECIAL CORRESPONDENCE OF THE TIMES. | CATT OF MEXICO, Aug. 22, 1886.—By the time this screed shall reach its destination, the Cutting affair will no doute have been disposed of, as Col. Sedgwick is expected to arrive here to-morrow morning, to confer with the Secretary of Foreign Relations, Señor Mariscal. It seems to me, however, that this complication affords a fitting text, on which to discourse, in disabuse of the American mind regarding certain conditions in Mexico. I know that a wide-spread opinion prevails that there is no safety in this country for foreigners, either for property of person. In reality I sincerely believe that Americans enjoy greater security and consideration here than in many parts of the United States. That the other belief obtains is due to the unscrupulous reports of newspaper correspondents, bent on turning off so much copy, and unqualified to judge of the gountry, through ignorance of the lunguage and institutions of content of turning off so much copy, and unqualified to judge of the gountry, through ignorance of the lunguage and institutions of content of turning off so much copy, and unqualified to judge of the gountry, through ignorance of the lunguage and institutions of content of the language and institutions of content of TOLARE.

THE UNIVERSITY TRACT

We are now offering lots in this beautiful part of the city and wish to call special attention to the many advantages this property has. The lots are large, being 65x130 feet. The University of Southern California, just being completed at a cost of \$50,000, is situated in the center of this tract. A fine church and a large number of fine residences have already been built, and many more will be built this fall. The large campus surrounding the University building is to be laid out by one of the best landscape gardeners, and it will be one of the most beautiful spots in all California. This tract has street cars and railway running through it. It is situated on the finest drive in the city, and only a short distance from the "Longstreet Place" Lots are selling rapidly at \$400 to \$450 for inside, and \$500 for corner lots. It is the cheapest and most desirable property in Los Angeles. We will take pleasure in showing the property to any who will call at our office.

correspondents, bent on turning off so much copy, and unqualified to judge of the country, through ignorance of the luguage and institutions or for other reasons, who therefore invent all man-

guinary 'greaser." Let us investigate a few of the cases which have excited so much commotion, and wasted a vast quantity of a fine article of sympathy upon very undeserving objects. First, upon very undeserving objects. First the Cutting case. While it is hardly to the point to recur to the fact that he is a vagabondish sort of person, of very unsavory reputation, still that may be regarded as a collateral feature sustaining the Mexican government, for people of that element are continually in legal ever, viewed from a strictly legal stand-point, this man was certainly subject stitutes a crime within the limits of

their jurisdiction. The offense of Cutting made him liable to punishment nder the law of Chihuahua. Let us apply the case inversely: There is certain offense against the law and morality, on American soil very readily unishable by recourse to the courts legal redress. Suppose that Me-dina or any other Mexican citizen, meeting on Mexican soil a sister of prosecution by her relatives in case he sppeared in the United States, and suppose, further, that he had dared such prosecution by crossing the border and flaunting himself in the faces of of the Times. Now, the editor of our the aggrieved parties. How long would the Times has no merely personal can court to try him, would it have antipathy towards the Republican been any part of the duty of that body

seem to require that the contemporaneous editor should refrain from repeating his mistaken allegation against us.

Mr. Osborne, the responsible editor of the Express, persists in bringing into this discussion the name of a parson who does not figure in the case, except in the background, to-wit., Mr. Boyce, whom, Mr. Osborne asserts, the Boyce, whom, Mr. Osborne asserts, the ment in connection with this tempest editor of the Times "intensely dislikes." in a teapot; but I believe there are not Well, it is true that the editor of the Traces does not like this man Boyce, because he knows him too thoroughly. He has, in fact, no respect for ceremonious Mexicans, and the severest strictures I have heard from them in connection with the affair have been in disapprobation of such belittling of the representative of his Government. As the behavior of the Mexican officials has been courteous, dignified and selfrespecting, so the popular expression of sentiment has been moderate and

of attack which it has incautiously and injudiciously adopted in the present campaign chiquito? How would it do, now, beloved but deluded contem-European forces, and probably of a faction of the United States as faction of the United States and Section Mariscal hands of United States as faction of United States as faction

"F. MONDAGON. "PIEDBAS NEGBAS, July 26, 1886. "To Bonifacio Diaz, Deputy Sheriff, Eagle Pass, Tex." On no better warrant, the Texas authorities delivered over Arresuris. Dil they consider themselves justified in getting rid of him on account of his reputation, or had they an eye to inciting war, and the consequent contraband trade, by aggravating the riotous passions existing over the Cutting case? It was stated persistently in Texas that Arresuris was brutally murdered, but it aptally murdered, but it ap-peared from the judicial investigation that he was killed by the guards in a fight which he made to escape, and he succeeded in disarming one guard, and wounded the horse of another. About the same time that the news of the

Mr. E. also adds that he has always found the Lagos officials to be periect gentlemen, and that in his ex-perience Americans have always been to blame for getting into trouble with Mexican authorities." DEFER VOTA STREET MINOR.

DEFER VOTA S The Hakalan Sugar Plantation Company, of the Sandwich islands, has deriver, and no city connell, with a proper regard for the eternal fitness of things, will expect contributions from country residents for this purpose. Attention was called to the disgraceful condition of the Glendale, or San Fernando road, within the city limits. This road is probably traversed as much as any road leading to or from Los Angeles, and yet within the last eighteen months the city has done nothing for it, except to have Col. Miller's gang spend two days last winter in hauling sand and large boulders upon a portion of it which had been for a week or two impassable for loaded wagons. The boulders still remain, making the road now impassable except for well-shot animals at a slow walk. A committee of loaded wagon, but the early gains were afterwards need of work upon this road. In the opinion of many, there is a greater necessity for a bridge over the Arroyo Seco, near is mouth, than for one at the Buena Vista street crossing of the river. Leaving city affairs, the meeting proceeded to the discussion of needs. A committee of five was appointed to stend to the opening up of more cross-roads through the valley, the present city of more cross-roads through the valley, the present city of the control of the present city of the pres ent circuitous byways being serious

present circuitous byways being serious drawbacks to the progress of the settlement. Several land-owners present expressed their willingness to give rights of way, and there is a probability of some good work being done in this direction. The subject of hotels and boarding houses being brought up, developed the somewhat surprising fact that, with the exception of Prof. Burtt's boarding house on the hills on the extreme west of the settlement, there is no place of public accommodation in the valley. That a locality so favored by nature with a genial climate, romantic scenery, the nearness of mountains, and in such close proximity to Los Angeles (5 miles), should not yet have produced an abundant crop of boarding houses and hopeful invalids, was thought to be such a phenomenal thing that it was entered hopeful invalids, was thought to be such a phenomenal thing that it was entered upon the minutes! There is no doubt but that pecuniary success will attend the man or woman who shall establish the first large and well-appointed hotel in the vicinity of Glendale and Verdugo. Measures were taken leoking toward the proper subdivision and placing on the market of some unimproved but desirable tracts of land in the vicinity, the proper advertising of the same, etc.

Catarrhal Deafness Catarrhal Deafness.

Loss of hearing is in a large proportion of eases the direct result of inflammation of the mucous membrane lining the throat and nassal passages, catarrh being in fact one of the most frequent causes. Influenced by it, the internal passages to the ears, which are situated on the pharprax above and behind the palate, and which are known as the eustachian tubes, become involved in the same general inflammation of the surrounding parts, and in course of time become more or less obstructed, owing to the thickening of the membrane lining them. Any obstruction results in partial or complete loss of hearing. Treatment directed to the external ear can effect no benefit, simply because it does not reach the seat of the difficulty, and under it the disease goes on unchecked from bad to wors. In such cases it results from the catarrhal inflammation, and can only be remaded by the removal of that inflammation which is its existing cause. The failure to successfully treat it arises from the fact that no well-directed or radical effort is made for

Ein the treatment of catarrhal deafness, by directing our attention to the cause, we can remove the effect, and in no other way.

By appropriate direct treatment to the internal ear, the hearing can in most cases be improved from the outset; but to render it radical, every vestige of the catarrhal inflammation of the surrounding parts must be removed.

mation of the surrounding parts must be removed.

By the employment of proper inhalations in the form of medicated vapor (act steam or spray) we are able to produce immediate and direct action upon the discased surface in the pharynx and nassi passages, for air will find its way into the most remote and intricate cavities, where it is utterly impossible to make fluid applications. By these means, every case can be helped, and a majority cured. CONSULTATION FREE. Those who desire to consult with me in re M. HILTON WILLIAMS, M. D.,
